This will be achieved by our **mission** which is to offer affordable membership fees, provide free (or low cost) meetings, courses, conferences and seminars, facilitate networking for our members, partner with other professional bodies, liaise with organisations such as the HSE, Local Authorities, Fire Authorities and Health Boards, promote sensibly based risk assessments, encourage business growth, as well as to enable SMEs to have a friendly and helpful source of information on occupational safety and health.

Our interesting programme of events covers many relevant topics. At our meetings, there is usually a member of HSE or a local authority environmental health officer present to give us updates, as well as to answer questions and of course, there is always plenty of opportunity to network with fellow professionals.

Our Annual Awards Dinner is always enjoyable and it is where the safety performances of our members are recognised by the presentation of shields and certificates by the HSE. We encourage all our members, no matter how large or small to apply for our awards.

Our Annual Seminar is held in June and is as usual, on a single, topical, health and safety subject.

For much more information about us and our activities and to get up to date information about our events see our website: <http://swwsafetygroup.co.uk>
